

# Pricing

Shared Lives services is priced on a banded basis. There are banding level descriptors for the long-term service and the short break service and all prices for services are determined on this basis, under the terms of our contract with your local authority/trust.

All prices are shown ex VAT. VAT may be applied to elements of the price as applicable when invoiced.

## Long-term services

- Special level is individually negotiated and the price indicated is the minimum price at this level
- The cost of service for panel figure at each band is the maximum likely cost to the local authority/trust or the Shared Lives service. This is the amount that should be taken to any funding panel. This may be reduced following a charging assessment, undertaken by SLSW on behalf of the local authority/trust as part of our contract. Any assessed contribution will be the responsibility of the person using the service
- The cost of service for panel figure includes a fixed amount per service paid to SLSW to arrange, monitor and support the service in line with the requirements of CQC (the organisational charge), and a variable amount which is paid to the carer (the care and support charge), which considers the required input of the Shared Lives carer to support the person using the service meet the desired outcomes of the service. Both these elements have been agreed through the procurement process and are fixed for the duration of the contract, except for inflation increases or other mutually agreed review.
- The cost of the service is shared between the person using the service and the local authority/trust. The commissioning local authority meets all costs related to the provision of care and support and the management of the service minus any assessed service user contribution. People using our services are normally also responsible for meeting their own rent and household costs. Currently **£187.00 per week**.
- In some cases it may be agreed that the commissioning Authority underwrites this cost while the person using the services is being supported to claim all eligible welfare benefits. Any monies recovered relating to this period may be reimbursed to the authority/trust at a later date.

## Short breaks and day support

Services Rates (up to eight hours, if the break extends past 8hrs the nightly rate will be paid/charged)

**A Band Level descriptor table can be downloaded in a separate document**

Short break and day support services are charged at an inclusive cost on a banded basis. The price of the service will be determined according to the needs of the service user, the desired outcomes for the person using the service and the amount of effort, input, skills and knowledge required by the SLSW Carers to meet those needs and outcomes, as agreed by SLSW and the care manager. Prices for a person using our services whose needs are in excess of our band levels are negotiated on an individual basis.
